

Enhancement of Environmental Management

The OEPC group considers environmental issues to be the most important management issues because we want to become a driving force for Okinawa through energy and connect Churashima(the pure beautiful islands) to the future. We are developing various initiatives based on the OEPC Group Environmental Policy as a corporate group responsible for the global environment to retain the trust of local communities and customers.

Proactive promotion of environmental action management system

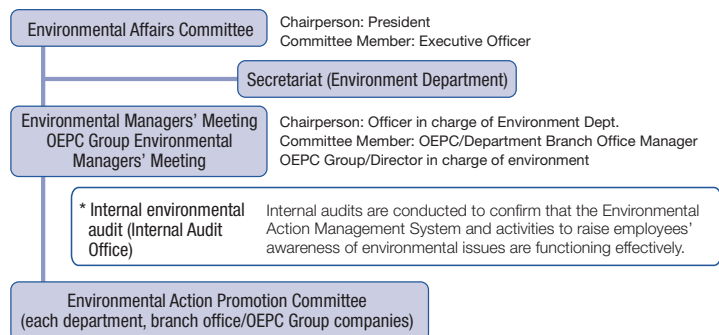

We have established the “Environmental Action Management System”, which is operated to carry out environmentally friendly business activities and conduct environmental activities by setting environmental targets, using the results for further improvement.

Promotion System

We have established the “Environmental Affairs Committee” chaired by the President, and the “Environmental Managers’ Council” and “Environmental Managers’ Council of the OEPC Group”, consisting of the OEPC Group, as subordinate bodies of the committee, for the proper operation of the Environmental Action Management System. The committee examines issues about environmental problems and decides policies and measures after deliberation.

We have also formed the “Environmental Action Promotion Committee” at each department, and each OEPC group company and the entire group engages proactively in environmental action. We conduct internal environmental audits to confirm that the environmental action system is functioning effectively.

Promotion Structure

OEPC Group Environmental Policy

Environmental Philosophy

The OEPC Group strives to promote a group-wide environmental action and enhance environmental management to enable us to leave a rich and beautiful global environment to future generations, conducting our business activities with maximum emphasis on the environment. Each individual employee acts proactively toward realization of the sustainable development of our society, with a high level of awareness.

Environmental Action Guidelines

1. Promotion of Global Warming Countermeasures
2. Promotion of local environmental conservation
3. Promoting a Recycling-Oriented Society
4. Promoting Environmental Communication
5. Enhancement of environmental management

Enacted: March 11, 2008 Latest revision: December 7, 2020

OEPC Group Medium-Term Environmental Targets

We have set mid-term targets for environmental action in our “Environmental Action Guidelines” for improvements required over the medium term, and the promotions are progressing steadily.

Environmental Action Guidelines	No.	Item	Medium-Term Environmental Targets (FY2023)
Promotion of Global Warming Countermeasures	1	CO ₂ emission control	In order to realize a low-carbon society, we will strive to reduce CO ₂ emissions in cooperation with the plan set forth by the Electricity Business Low Carbon Society Council. (Target for FY2030 (Ambitious target) : Reduce CO ₂ emissions by 30% compared to FY2005)
Promotion of local environmental conservation	2	Proper disposal of PCB waste	Dispose of all waste by the legally mandated disposal deadline.
Promoting a Recycling-Oriented Society	3	Promotion of the 3Rs of industrial waste	Recycling rate: 95% or more
	4	Promotion of green purchasing	Green purchasing rate: 85% or more
Promoting Environmental Communication	5	Promotion of measures against marine plastics	Promote beach (river) cleaning activities.
